

# Remote Assistance

by OrmaMacchine

*ORMAMACCHINE offers to its valued customers the remote assistance service; an ideal solution allowing us through a digital or analogical connection to grant a remote assistance service in a very easy and effective way.*

## Why

this service & maintenance "cost-optimization" investment will allow you to be concentrated entirely on your own business, keeping at the same time your production plants perfectly efficient.

## Quick

in real time, through a digital connection it is possible to carry out a full software control and solve any functioning problem.

## Safe

direct connection between Ormamacchine and your plant using last generation encryption systems. Connection is removed when the control of your plant is over.

## Complete

no need of extra devices.

## Simple and effective

once connected to the telephone line (digital/analogical) we'll be able to see your plant totally and to take action directly and immediately.

## Cost

the remote assistance service is supplied at the following cost:  
First year: € 1.500.=  
From the second year: 750,00 € (per year).

## Advantages

subscribing the contract, you'll have the right to use the remote assistance service during Ormamacchine working day hours.
