Remote Assistance
by OrmaMacchine

s.o.s.

ORMAMACCHINE offers to its valuated customers the remote assistance service; an ideal solution allowing us through a digital or analogical connection to grant a remote assistance service in a very easy and effective way.

Why
this service & maintenance "cost-optimization" investment will allow you to be concentrated entirely on your own business, keeping at the same time your production plants perfectly efficient.

Quick
in real time, through a digital connection it is possible to carry out a full software control and solve any functioning problem.

Safe
direct connection between Ormamacchine and your plant using last generation encryption systems. Connection is removed when the control of your plant is over.

Complete
no need of extra devices.

Simple and effective
once connected to internet we'll be able to see your plant totally and to take action directly and immediately.

Cost
the remote assistance service is supplied at the following cost: First year:€ 1.500.= From the second year: 750,00 € (per year).

Advantages
subscribing the contract, you'll have the right to use the remote assistance service during Ormamacchine working day hours.
